

# Spays and Neuters

(We recommend Spaying and Neutering between 5-6 months old.)

## Spays

Cost does vary depending on size and age for dogs. Cats have one standard price due their size. Spaying your pet can help prevent illnesses like pyometra and possibly mammary cancer. Spaying also makes sure you don't have any unwanted litters.

## Neuters

Once again, cost does vary by size for dogs and cats have a standard set price. Neutering can help prevent issues with their prostate. Also, it may help with some behavioral issues like roaming, marking territory and possibly even some aggression issues.

(All Spays and Neuters include Blood Work, Anesthesia, Surgery and Pain Injection)
